I want to work as a UI/UX designer and learn more about the design process in order to enhance my professional skills further. I also want to contribute to the organization by acting as a catalyst for growth and a key component in its future success.

Skills

Figma | Prototyping | Wireframe | User Research | User Experience | Sketch | Photoshop | HTML5 | CSS3 | Python | C and C++ | Linux | Networking and Wi-fi Technologies | Unit Testing | Interpersonal Skill | Video Editing

Experience

NOVEMBER 2022 – APRIL 2023

Data Analyst & A3 / Capgemini, Bangalore

With the aid of C programming and Unix, I created little projects that allowed me to study in-depth about a programming language that is near to the machine. Worked with Wi-Fi technology and networking, gaining practical knowledge of the hardware network device and technical experience with it.

Education

NOVEMBER 2022

Bachelors Of Computer Application / New Horizon Degree College, Bangalore

I learned a lot in my chosen subject of study during my three years in college and developed a variety of talents. I was a standout in my major-related coursework and took part in extracurricular activities that expanded my horizons and developed my leadership skills.

JUNE 2019

Pre-University College / Mahadeva PU College, Hoskote

As I transferred from college to school, I was pushed outside of my comfort zone and gained a lot of experience and exposure that helped me grow. from being a shy girl to developing into an outgoing and active person. I took part in a range of dance, drawing, and other activities that brought me one step closer to my objective.

Certifications

NOVEMBER 2022
UI UX Boot Camp / Growth School

A one-month boot camp that helped me kick start my journey as a UI UX Designer. From not knowing what UI UX is to understanding about various topics in UX/UI design, such as when to use fonts, frames, color gradients, alignment, and so on. Concept of spacing on different types of devices and learned how most designers work and how I can improve my skills as an UI UX Designer.

DECEMBER 2022
Master Digital Product Design: UX Research & UI Design / Udemy

The one-month Boot camp was great and had a lot of hands-on experience but I lacked the in-depth knowledge of each concept and on my journey to explore in depth concepts I came across this wonderful course in Udemy. The course had a lot of theoretical knowledge and concept of product design. How to perform user research and how to understand pain points of a customer.

MARCH 2023
Complete Web & Mobile Designer in 2023: UI/UX, Figma / Udemy

I was always fascinated on how the website work. After understanding and implementing design principals on Product design, I was eager to get my hands dirty with web and mobile designing. I wanted to learn the design principal for web and mobile designing and this course had just that created a lot of projects from food app to personal website and still learning a lot and trying to improve bit by bit.

JULY 2019
Python Programming Core / Aspire Solutions

This additional course offered by my university as extra-curricular activity helped me to improve my coding knowledge. It was a hands-on workshop learning DSA using Python and advance python topics.

Activities

I always want to keep busy with extra pursuits. I have always been interested in sports, which inspired me to start taking boxing lessons. My focus gradually shifted to other pursuits as I began to code, sketch, bake, edit videos, take photos, and do a lot more. At my college festival, I volunteered for events and even took part in several activities.
